

FirstChoice Clinic

Over the past 6 years, our Clinic's staff and board of directors has received quality training resources and guidance in sustainability and capacity building for our nonprofit. The results cannot be disputed - we have grown in areas such as revenue, program enhancement and number of clients/students served. Our revenue has quadrupled as a result of the training and support in revenue development, fundraising and donor development, and grant writing assistance provided by Impact Foundation. More importantly, we have been able to provide more of our services to clients and presently we are underway in developing satellite clinics in distressed communities in North Dakota.

- Pauline Economon, Executive Director
